

Slash Data Protection Cost and Complexity with Commvault and Wasabi

Back up to the World's Most Affordable and Fastest Cloud Storage Service

Data growth is spiraling out of control—doubling every year in many businesses. Data sprawl is a major challenge for many organizations. Conventional on-site storage solutions and first-generation cloud storage services are too costly and complex to scale. And traditional data management practices using multiple backup and recovery tools are inherently slow and inefficient.

Wasabi has partnered with Commvault to help businesses contain storage costs, simplify data protection and reduce risks. Wasabi hot cloud storage is incredibly affordable and fast cloud object storage for any purpose. And Commvault offers a comprehensive data management platform that eliminates point data protection products and siloed backup and restoration processes. The integrated solution can help you slash expenses, simplify operations and improve RPOs and RTOs.
