

Accelerate Content Delivery and Avoid Transfer Fees with Cloudflare and Wasabi

Remarkably fast and economical content storage and delivery

Businesses are counting on cloud-based applications and web-based services to gain a competitive edge in today's digital economy. But infrastructure cost and performance obstacles and operational complexity can stand in the way. Traditional on-site storage platforms and first-generation cloud storage services are too costly and complicated for the digital era. And delivering bandwidth-intensive, delay-sensitive content over the public internet can result in poor user experiences and frustrated customers.

Wasabi has partnered with [Cloudflare](#) to help companies break down infrastructure barriers and optimize quality of experience. Wasabi hot cloud storage is incredibly affordable and fast cloud object storage for any purpose. And the Cloudflare content delivery network eliminates internet latency and performance bottlenecks, optimizing user experiences. The tightly integrated solution provides extremely fast, affordable and scalable content storage and delivery for the cloud-first, mobile-first world.

Wasabi is a proud member of the Cloudflare Bandwidth Alliance program. That means Wasabi customers can download data to the Cloudflare CDN with no transfer fees.¹

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Speed

Wasabi hot cloud storage is the industry's most affordable and highest-performing cloud storage service. Wasabi is 80% cheaper and 6x the speed of alternative cloud storage services like Amazon S3, with no egress fees or API charges.

Cloudflare Content Delivery Network Optimizes Global Performance

Cloudflare provides a global content delivery network with unique performance optimization capabilities. Trusted by leading brands and institutions like Udacity, Zendesk and the U.S. Library of Congress, Cloudflare delivers more web traffic than Twitter, Amazon, Apple, Instagram, Bing and Wikipedia combined.

Unlike a conventional CDN, Cloudflare caches static content, accelerates dynamic content and makes it easy to optimize outbound content. Cloudflare goes beyond a traditional CDN because, in addition to bringing your content closer to your site's visitors, Cloudflare also optimizes content for device, browser and bandwidth needs.

Cloudflare built a best-in-class, global infrastructure from the ground up using only next-generation, high-performance equipment—no legacy software or hardware. The result is a CDN that's easier to set up, more affordable and engineered to outperform any legacy CDN on the market.

Integrated Solution Provides Fast and Affordable Content Storage and Delivery

You can use Wasabi and Cloudflare to store and distribute content quickly and cost-effectively. Wasabi can be deployed as a Cloudflare origin server, interfacing directly with the CDN via Wasabi's S3 API. The integrated solution improves user experiences by caching static content at the edge of the network closer to the user, and by accelerating dynamic content. You can store all your digital content on Wasabi for a fraction of the cost of alternative solutions and deliver it worldwide on Cloudflare, with no transfer fees. The result is an incredibly affordable solution that dramatically improves web application performance and reliability.
